

# The “Twitcher™” for Fencing

**The only wire strainer you will ever need! Throw away the rest!**

(visit [www.krieslco.com.au](http://www.krieslco.com.au) to view the video)

*Simply place against wire...*

*Apply Applicator & wind up...*

*Tuck under or over...*

**Remove the applicator and the job's done!**

**Simple to use** – Takes only seconds to apply! No mechanical working parts.

**Will not damage or rust wire** – “Twitcher™” hot dipped galvanising, gentle wind, no welds and no rust.

**Extensive uses** – fences, trellising, sheep and deer netting, dog netting.

**Build & maintain any fence or trellis** – “Twitcher™” stays on the wire

**Inexpensive** – can be removed from old existing fence, and re-used to strain a new fence.

**Wide range of strain** – from 1 metre to 500 metres.

**Controlled straining** – very user-friendly extreme strength not necessary.

**Easy application** – suitable for the elderly, arthritic and disabled.

**Build a new fence** – tie off on end posts, position “Twitcher™” and crank up.

**Re-strain a ‘tired’ fence** – slack wire? – place “Twitcher™” against wire, apply crank, wind up.

**Re-strain at any later stage** – just re-apply the crank, release “Twitcher™” and rewind.

**Barbed wire** – the only way, existing fences, or new.

**No need to release ties or staples** – “spot strain” between posts or stays.

**Barbed wire straining time reduced** – days of work reduced to hours!

**Barbed wire joining** – join and strain at the same time. Painless. To join barbed, pass wires from either direction, overlapping approx. 15 cm, place “Twitcher™” against both wires, apply crank and wind up – simple! (Wire joined and strained in one step.)

**Well proven** – “Twitcher™” extensively sold and manufactured for over 20 years.

**Manufactured in Australia** – From Australian Steel and a Friendly Australian Family owned company

**Sheep, Dog or Deer Netting** – Individually strain each horizontal wire with ease. To allow for extra straining length, simply snip the vertical Wire and remove. Straining with the “Twitcher™” is the only method, where netting can be uniformly strained on undulating terrain, without the necessity of cutting and joining the wire.

**Try the Twitcher STARTER KIT** (Postage Incl.)

[10 Twitchers, 1 Applicator, 3 Wire Joiners]

**Mail Order service Australia wide.**

*Guaranteed 30 day money back, no questions asked*
